

BONNEY FORGE

TO: All Stocking Distributors  
FROM: Michele Jones  
DATE: January 5, 2022  
SUBJ: Cast Steel Valves CSV-10

On February 1, 2022, the following price increase will be in effect:

- Cast Steel Valves = 7.5%

This increase is precipitated by rising raw material and overall operating costs. Should these costs continue to escalate, we will be required to further adjust our prices accordingly.

All other related terms and conditions remain unchanged.

Once again, thank you for your continued support on all Bonney Forge and WFI product lines.

Sincerely,

Michele Jones
